NOTES TO FINANCIAL STATEMENTS (UNAUDITED)

SIX MONTHS ENDED OCTOBER 31, 2004

(EXPRESSED IN CANADIAN DOLLARS)

1. NATURE OF OPERATIONS AND GOING CONCERN

Kirkland Lake Gold Inc. (The Company) owns gold mining and milling operations in Kirkland Lake, Canada, which were inactive when acquired in December 2001 and have been placed back into commercial production. During the year end 2003 the company reached commercial production. The continued operations of the company are dependent upon the existence of economically recoverable reserves, the ability of the company to obtain financing as required to sustain the development, and upon future profitable production.

At October 31st, 2004, the company had a working capital deficit of \$694,820. Included in current liabilities are convertible loans of \$3,293,237. Subsequent to the period end, on November 16, 2004, the company completed a sale by private placement of 1,950,292 new common shares at a price of \$6.00 per share, for gross proceeds of \$11,700,000. Management estimates that these funds, together with funds from operations will be sufficient to meet the company's obligations for the coming year. If necessary the company will raise additional financing to meet its obligations for the coming year. Actual funds from operations may vary significantly from management's estimates, due to changes in gold prices and foreign exchange rates, which are outside management's control, and the success of achieving future production volumes and production costs which the Company has not been able to achieve to date. Differences between actual results and management's estimates will occur, and these differences may be material. Accordingly, there is no assurance that operations will result in significant funds being available to the Company to continue in the normal course. The company's ability to continue as a going concern is dependent on future financings until the attainment of profitable and cash-generating operations sufficient to sustain the company. These financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary, should the company be unable to continue as a going concern.

2. SIGNIFICANT ACCOUNTING POLICIES

(a) BASIS OF PRESENTATION

The accompanying unaudited interim financial statements are prepared in accordance with generally accepted accounting principles ("GAAP") in Canada. They do not include all of the information and disclosures required by Canadian GAAP for annual audited financial statements. In the opinion of management, all adjustments considered necessary for fair presentation have been included in these financial statements. The interim financial statements should be read in conjunction with the Company's audited financial statements including the notes thereto for the year ended April 30, 004.

(b) STOCK - BASED COMPENSATION (CHANGE IN ACCOUNTING POLICY)

The Company has a stock option plan as described in note (9). Effective May 1, 2004, the Company adopted the new accounting standard for stock - based compensation. The standard sets out a fair value approach that is required for all stock - based transactions. Prior to May 1, 2004, the Company used the intrinsic value - based method to account for its employee stock incentive plan, and therefore no compensation expense had been recognized under the plan for stock options issued to employees and directors. This change in policy has been applied retroactively without restatement of prior periods.

Stock - based compensation on options is recorded as an expense in the period the options are vested, based on the fair value estimated based on the Black - Scholes option pricing method.

SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

The restatement resulted in a cumulative increase of \$ 807,250 to the opening deficit at May 1, 2004 and increases of \$ 132,009, \$ 54,030 and \$ 621,211 to share capital, contributed surplus, and options respectively.

(c) ASSET RETIREMENT OBLIGATION

On May 1, 2004 the Company retroactively adopted the new CICA accounting standard, section 3110 for asset retirement obligations. The adoption has not resulted in a material impact.

7. CONVERTIBLE LOANS

(a) On June 11, 2004, the company completed loan financing of \$2,406,250. The loan has a term of six months and bears interest at the rate of 10% per year.

The principal amount of the loan is convertible at the lenders' option into common shares at the rate of \$4.40 per common share.

The company has determined the value of the equity conversion feature of the convertible loans to be \$346,344 using the Black-Scholes option pricing model. The remainder of \$2,059,906 was classified as debt.

The lenders received an aggregate of 54,140 common shares as a bonus for making the loans. The common shares have been determined to have a fair value of \$216,019 which will be amortized over the term of the loan.

(b) On June 10, 2003, the company agreed in principle to complete a loan financing of \$1,000,000. The loan has a term of eighteen months, which can be extended for eighteen months at the company's option (see below), and bears interest at the rate of 10% per year.

The principal amount of the loan is convertible at the lenders' option into common shares at the rate of \$4.00 per common share and the accrued interest is convertible into common shares at the rate equal to the higher of \$4.00 per common share or the then market price of the company's shares. If the loan is converted or repaid before the first anniversary date of the closing in August 2003, the lenders shall receive one year's worth of interest (excluding interest converted into shares) on the original loan amount.

The company has determined the value of the equity conversion feature of the convertible loans to be \$189,111 using the Black-Scholes option pricing model. The remainder of \$810,889 was classified as debt.

On August 11, 2003 the lenders received an aggregate of 75,000 common shares at \$3.00, as a bonus for making the loans, which have been determined to have a fair value of \$225,000 and will be amortized over the initial term of the loan.

At the company's option, the maturity date of the loan may be extended 18 months by the issuance of 75,000 common shares. The common shares, when issued, will be subject to a four month hold period from issuance of such common shares.

(c) A summary of deferred finance charges incurred and amortization during the period is shown below.

(a) On June 10, 2004, the company issued 54,140 common shares at a fair value of \$3.99 per common share, as a bonus on the \$2,406,250 convertible loan financing (Note 7(a)).

(b) On July 29, 2004, the company closed a brokered private placement of 3,987,730 shares at a price of \$4.00 per share for gross proceeds of \$15,950,920. The agent also received 199,386 warrants exercisable at \$4.00 as compensation for the placement. The warrants expire January 29, 2006. The company incurred commissions, fees and legal costs totalling \$1,670,367 in connection with this placement. Cash related to this private placement was received by the company on August 3, 2004.

9. OPTIONS

The company has adopted a stock option plan. The plan allows the company to grant options to directors, senior officers and employees of or consultants to the company and its subsidiaries or employees of a corporation providing management services to the company to acquire up to 2,000,000 common shares.

The plan provides that the exercise price of an option granted under the plan shall not be less than the market price at the time of granting the option. Options have a maximum term of 10 years and terminate on the 90th day after the optionee ceased to be any of a director, officer, consultant or employee; on the 30th day after the optionee ceased to be an employee or consultant if the optionee was engaged in providing investor relations services for the company; or the earlier of the 90th day and the third month after the optionee ceased to be an employee or officer if the optionee is subject to the tax laws of the United States of America.

Notwithstanding that options can have a maximum term of 10 years it is presently the policy of the company to issue options for terms of 5 years.

Stock options issued to officers, directors, employees and consultants are as follows:

	Number of shares	Weighted Average exercise price
Options outstanding - May 1	1,426,550	\$ 2.16

9. OPTIONS (CONT'D)

The following table summarizes information about stock options outstanding and exercisable at October 31, 2004:

		Options outstanding	Options exercisable	Outstanding options weighted average remaining life (years)	Exercisable options weighted average remaining life (years)
\$	1.10	200,000	200,000	1.40	1.40

	\$1.10 - \$4.70	1,406,375	663,625	3.11	2.07

The company grants all employee stock options with an exercise price equal to the market value of the underlying common shares on the date of grant. Compensation costs for all grants under the employee stock option plan have been determined by the fair value method. Compensation expense recorded for the six months ended October 31, 2004 was \$234,217.

The fair value of each option at the date of grant was estimated using the Black-Scholes option-pricing model with the following assumptions:

	OCTOBER 31 2004	APRIL 30 2004
Expected life of options	5 years	5 years
Risk-free interest rate	3 - 4%	3 - 4%
Expected stock price volatility	70%	70%
Expected dividend yield	0%	0%
Weighted-average fair value of options	\$ 2.59	\$ 2.75

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore, the existing models do not necessarily provide a reliable measure of the fair value of the company's stock options.

For the period ended October 31, 2004, the value of stock options granted is \$855,427. The fair value of these options is estimated using the Black-Scholes option pricing model.
