KIRKLAND LAKE GOLD INC.

Notes to Interim Consolidated Financial Statements

Six Months Ended October 31, 2005

1 NATURE OF OPERATIONS AND GOING CONCERN

Kirkland Lake Gold Inc. (the Company) owns gold mining and milling operations in Kirkland Lake, Canada, which were inactive when acquired in December 2001. The continued operations of the Company are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain financing as required to sustain the development, and upon future profitable production.

At October 31, 2005, the Company had working capital of \$ 6,798,981. Management estimates that these funds, together with funds from operations will be sufficient to meet the Company's obligations for the coming year. If necessary the Company will raise additional financing to meet its obligations for the coming year. Actual funds from operations may vary significantly from management's estimates, due to changes in gold prices and foreign exchange rates, which are outside management's control, and the success of achieving future estimated production volumes and production costs. Differences between actual results and management's estimates will occur, and these differences may be material. Accordingly, there is no assurance that operations will result in significant funds being available to the Company to continue in the normal course. The Company's ability to continue as a going concern is dependent on future financings until the attainment of profitable and cash-generating operations sufficient to sustain the Company. These financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary, should the Company be unable to continue as a going concern.

2 SIGNIFICANT ACCOUNTING POLICIES

Generally accepted accounting principles

The accompanying unaudited interim financial statements are prepared in accordance with generally accepted accounting principles ("GAAP") in Canada. They do not include all of the information and disclosures required by Canadian GAAP for annual audited financial statements. In the opinion of management, all adjustments considered necessary for fair presentation have been included in these financial statements. The interim financial statements should be read in conjunction with the Company's audited financial statements including the notes thereto for the year ended April 30, 2005.

Stock based compensation

The Company has a stock option plan as described in note (9). Effective May 1, 2004, the Company adopted the new accounting standard for stock - based compensation. The standard sets out a fair value approach that is required for all stock – based transactions. Prior to May 1, 2004, the Company used the intrinsic value - based method to account for its employee stock incentive plan, and therefore no compensation expense had been recognized under the plan for stock options issued to employees and directors. This change in policy has been applied retroactively without restatement of prior periods.

Stock – based compensation on options is recorded as an expense in the period the options are vested, based on the fair value estimated based on the Black – Scholes option pricing method.

The restatement resulted in a cumulative increase of \$ 807,250 to the opening deficit at May 1, 2004 and increases of \$ 132,009, \$ 54,030 and \$ 621,211 to share capital, contributed surplus, and options respectively.

Asset retirement obligation

On May 1, 2004 the Company retroactively adopted the new CICA accounting standard, section 3110 for "Asset Retirement Obligations". Operating under this section, future obligations to retire an asset or property are recognized and recorded as a liability at fair value as at the time the asset is acquired, or the event occurs giving rise to such an obligation. At each reporting period, asset retirement obligations are increased to reflect the interest element (accretion expense) considered in the initial fair value measurement of the liabilities. In addition, an asset retirement cost is added to the carrying amount of the related asset, and depreciated over the life of the asset. The capitalized asset retirement cost is amortized on the same basis as the related asset and along with the accretion expense, is included in net income. The adoption of this standard did not have any material impact on the Company's financial position or results.

3 SHORT TERM INVESTMENTS

The Company's short-term investments include \$225,000 held as collateral to provide a letter of credit to the Independent Electricity Market Operator as security for payment in connection with ongoing electricity usage, and \$500,000 as a security deposit at the Royal Bank of Canada to cover payroll electronic file transfers.

9 OPTIONS

The Company has adopted a stock option plan. The plan allows the Company to grant options to directors, senior officers and employees of or consultants to the Company and its subsidiaries or employees of a corporation providing management services to the Company. The aggregate number of shares which may be subject to issuance pursuant to options granted under this plan is 3,500,000 shares. The plan provides that the exercise price of an option granted under the plan shall not be less than the market price at the time of granting the option. Options have a maximum term of 10 years and terminate on the 90th day after the optionee ceased to be any of a director, officer, consultant or employee; on the 30th day after the optionee ceased to be an employee or consultant if the optionee was engaged in providing investor relations services for the Company; or the earlier of the 90th day and the third month after the optionee ceased to be an employee or officer if the optionee is subject to the tax laws of the United States of America.

Notwithstanding that options can have a maximum term of 10 years it is presently the policy of the Company to issue options for terms of five years.

The change in stock options issued during the six month period ended October 31 is as follows:

	October 31 2005		April 30 2005	
	Number of shares	Weighted average exercise price \$	Number of shares	Weighted average exercise price \$

The following table summarizes information about stock options outstanding and exercisable at October 31, 2005:

Exercise price \$	Options outstanding	Options exercisable	Outstanding options weighted average remaining life (years)	Exercisable options weighted average remaining life (years)
1.10	200,000	200,000	0.40	0.40
1.35	266,000	266,000	0.92	0.92

<u>1.10 – 4.70</u>	<u>1,148,999</u>	<u>945,249</u>	<u>2.04</u>	<u>2.04</u>

The fair value of each option at the date of grant was estimated using the Black-Scholes option-pricing method with the following assumptions:

	<u>October 31, 2005</u>	<u>April 30, 2005</u>
Expected life of options	5 years	5 years
Risk-free interest rate	3 - 4%	3 - 4%
Expected stock price volatility	70%	70%
Expected dividend yield	-	-
Weighted-average fair value of options	<u>\$1.41</u>	<u>\$2.75</u>

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore, the existing models do not necessarily provide a reliable measure of the fair value of the Company's stock option.
